

Technician position in neuroscience lab at DANDRITE, Aarhus University

We are looking for a motivated laboratory technician in our laboratory Circuits for Motor Control and Behavioural Organisation at DANDRITE, the Danish Research Institute of Translational Neuroscience, at Aarhus University. The position is a full time maternity cover.

Responsibilities and tasks

Your responsibilities will be maintenance of *Drosophila* stocks, preparation of fly food, general maintenance work in the lab (e.g. media preparation, autoclaving, organizing supplies) and assistance with experiments. Depending on experience, skill and interest, you might also carry out an independent part of a research project.

Qualifications

The working language is English, and you should therefore be fluent in English and have good communication skills. Previous experience in *Drosophila* culture, neuroscience, microscopy and/or molecular biology techniques is of advantage, but not necessarily required. We are looking for a responsible and reliable person who works effectively and with care. It is required that you are educated as laboratory technician..

Working place

We are a small international lab with a friendly atmosphere. The employment will take place at Department of Molecular Biology and Genetics, Gustav Wiedes Vej 10C, 8000 Aarhus. However the physical working place will be, where Anne von Philipsborn's research group is located in building 1171, at Dept. Biomedicine, Ole Worms Allé 3, 8000 Aarhus.

Further information and contact

Feel free to contact Group Leader/Associate Professor Dr. Anne von Philipsborn, if you have any questions: avp@dandrite.au.dk
